CONFERENCE OBJECTIVE :

India has become the largest manufacturer of 2 Wheelers in the world during 2016-17 beating China to the second place. A New Era in terms of regulations –safety and stringent norms of BS-VI in 2020 has posed a serious challenge to the industry.

Indian 2 Wheeler industry is not caught unawares and has been steadily preparing to face the challenge by offering game-changing products climbing up the technology curve.

The concept of electric mobility has begun in right earnest where new start-ups are pushing the barriers and testing their products with the whole ecosystem (including vendors and dealers) gearing up to support the industry.

Indian 2 Wheeler OEMs like Hero Motocorp, Mahindra 2 Wheeler, Bajaj Auto, TVS motor, Yamaha Royal Enfield, Honda Motorcycle and Scooters have set their sights high and are constantly strengthening their R&D and are introducing innovative features in emission control, ABS, Active Safety and Hybrid / Electric models to cope with the emerging challenges.

Set in this context, SAEINDIA Automotive Board is organizing a Two Wheeler Conference with the topic "Green Wheeler for Safe & Sustainable Mobility". The theme would be Greener, Smarter and Safer.
