

SAEINDIA INTERNATIONAL MOBILITY CONFERENCE 2024

11 - 13 December 2024

India Habitat Centre, New Delhi

www.saeindia.org

SAEINDIA is India's leading resource for mobility technology. As an individual member-driven society of mobility practitioners, the ownership of SAEINDIA lies with its members, who are Individuals from the mobility community, which includes Engineers, Executives from Industry, Government Officials, Academics and Students.

SAEINDIA is a strategic alliance partner of SAE International registered in India as an Indian nonprofit engineering and scientific society dedicated to the advancement of the mobility industry in India.

SAE International is a global association of more than 128,000 engineers and related technical experts in the aerospace, automotive and commercial-vehicle industries. Our core competencies are life-long learning and voluntary consensus standards development.

SAE International's charitable arm is the SAE Foundation, which supports many programs, including A World In Motion® and the Collegiate Design Series.

SAEINDIA in association with SAE International is organizing the **11th SAEINDIA International Mobility Conference**. The Conference theme is **“Reimagining Mobility in Amrit Kaal: Safe, Sustainable, Sociocentric”**. The conference will focus on key technology issues relevant to mobility engineering (see topics below). A strong national level participation comprising engineers, designers & scientists from OEM, component industry, academia, R&D organizations and the student community is expected.

TOPICS

- Autonomous & Connected Vehicles
- Emission, Environment & Sustainability
- Hybrid & Electric Vehicles
- Manufacturing, Materials & Lightweight Solutions
- Simulation & Testing Standards, Policies & Regulations
- Vehicle dynamics, Active Safety & Control
- Vehicle electronics & Software
- 5G Technology & Applications
- Carbon Neutral & Biofuel for sustainable future mobility
- Hydrogen & Fuel Cells

“Safe Sustainable Sociocentric”

India aims to become the third largest economy by the end of the decade and a \$35 trillion economy by 2047, with a commitment to Net Zero emissions by 2070. The auto industry must support this ambition by providing mobility solutions, driving economic progress, and supporting decarbonization.

Technological advancements, especially in Generative AI, are transforming daily life and will impact in-car and out-of-car experiences. The future of mobility will involve Connected, Autonomous, Shared, and Electric vehicles, integrating diverse technologies for sustainable and environmentally conscious solutions.

This conference is expected to be widely attended by over 600 – 700 mobility experts, entrepreneurs and leaders from across the mobility segments including professionals from R&D, manufacturing and services along with faculties, students and independent researchers. The conference will also have a concurrent exposition and technology theatre.
